PERSONAL PROFILE

People. That is the focus of my efforts, work, and ambition. People are constantly changing: whether it's the technology they use, their teams they work with, or even their ideas. I hope to collaborate and bring my perspective of inclusion, accessibility, and sustainability when developing strategies for improvement. I would love the opportunity to be part of the PWC team where I can both grow and help others grow. By being a part of journeys where we can develop solutions that create a positive impact, I want to support people in their projects and businesses.

SKILLS

Communication

In my customer support role, I speak to a variety of people daily to help them through technical and trade issues. Code Club volunteering has lead me to help young students learn about software development for their projects. These experiences have developed my ability in troubleshooting issues and finding ways to communicate them in a way the user can understand - this has now translated in communicating the strategies I develop to other teams. My work is always adapted to be personal to the client or company using clear language and so procedure documents are turned into solutions.

Teamwork

Throughout university, I have been in group projects which have taught me the value of developing a strong team dynamic. While working in customer support role, I've learned the importance of collaboration to promote internal work culture and to provide the best experience for our users. I believe in cultivating an environment where everyone is comfortable with sharing their ideas and asking questions because this is how I also grew confident in my skills.

Active Learner

I enjoy fast paced work and would never turn down an opportunity to grow my knowledge. I have been involved with teams beyond the scope of my initial role in order to provide knowledge and feedback on the customer experience.

WORK EXPERIENCE

OPERATIONS ANALYST

Hatch | 2021 - Present

- Developing solutions for customer onboarding processes with AML requirements
- Execution of customer onboarding - individual and trust accounts: collection of customer due diligence and know your customer information for account verification
- Reviewing and updating procedure documents for the Operations and Support teams, reporting on operational issues and banking statistics
- Banking support: reconciliation of foreign exchange revenue, booking foreign exchange trades, reconciling and verifying transactions

CUSTOMER SUCCESS SPECIALIST

Hatch | 2020 - 2021

- Worked on a variety of projects to improve the insights gained from customer contact, improve the onboarding process, and improve the deposit process with customer due diligence checks

CUSTOMER SUPPORT REPRESENTATIVE

Trade Me | 2018 - 2020

- Site Functionality and Trade Support Team. Consistently met Trade Me customer support objectives to a high standard. 95% customer satisfaction feedback rating (average is 85%), and a 99.62% 6-Week Rolling average internally marked quality score
- Worked responsibly to comply with security and risk standards - PCI DSS compliant, safely handling payment transactions, and retaining confidential information which may affect company stakeholders
